10 years of mentoring
at Kiel University

Thursday, 3rd December 2020, 14.00–16.00 h

In 2010 started **via:mento**, Kiel University's first mentoring programme for female researchers pursuing their academic career after PhD. On **3rd December** we want to celebrate **10 years of via:mento** – a decade with five lively university-wide and three additional marine science-specific mentoring groups adding up to more than 130 participants. On this occasion we also welcome our new mentees, who start their mentoring endeavours either in **via:mento** or in the new branch **via:mento_international**.
